

TABLE OF CONTENTS

	Page
Preface	(i)
Acknowledgement	(iii)
Table of contents	(v)
Introduction	1
Quality Evaluation of Feed Ingredients	5
- Variation in quality of feed ingredients	5
- Methods of quality evaluation of feed ingredients	7
Fundamentals of Feed Microscopy	9
- Principles of ingredient identification	11
- Reference ingredient collection	12
- Types of feed microscopy	12
- Instruments and equipment	13
- Sample preparation	14
- Inspection with stereomicroscope	16
- Inspection with compound microscope	16
- Quantitative estimation of ingredients	17
Feed Ingredient Descriptions and Photomicrographs	19
● Cereals and by-products	21
- Corn	22
- Rice and rice by-products	23
- Grain sorghum products	25
- Pearl millet	26
- Wheat products	27
- Barley products	29
- Oat products	30
● Photomicrographs of cereal grains and by-products	32
● Cereal and starch grain examination	45
● Oilseed meals	49
- Soybean meal and products	49
- Peanut products	51
- Cottonseed meal	52
- Kapokseed meal	53
- Copra meal	54
- Rubber seed meal	55

- Sunflower seed meal	55
- Palm kernel meal	56
- Rapeseed, canola seed meal	57
● Photomicrographs of oilseed meal	59
● High magnification drawings of selected oilseed meals	83
● Animal by-products	91
- Fish meal	91
- Shrimp meal	92
- Krill meal	93
- Crab meal	94
- Poultry products	95
- Feather meal or hydrolyzed feather meal	97
- Poultry meat meal	98
- Blood meal	99
- Meat meal or Meat and bone meal	99
- Bone meal	100
- Leather meal or hydrolyzed leather meal	101
- Ground shell	102
● Photomicrographs of animal by-products	103
● Miscellaneous products	125
- Cassava products	125
- Leucaena or ipil-ipil leaf meal	127
- Mungbean products	127
- Linseed or flaxseed meal	129
● Photomicrographs of miscellaneous products	130
Special Analysis Methods	139
● Methods in measurement of bulk density of feedstuffs	141
● Flotation techniques and estimation of ingredients in mixed feeds	147
● Application of flotation techniques	149
- Flotation of organic and inorganic constituents in feed ingredients and mixed feeds	149
- Test for vegetable cellulose and animal hair	150
- Flotation of meat fraction from bone fraction	150
- Flotation of blood meal from meat products	151
- Flotation of hydrolyzed feather meal from fish meal	152
- Flotation of rubber seed meal from fish meal	152
- Flotation of rice products	153

- Flotation of corn cob from ground corn	154
- Flotation of skin and stem from ground cassava root products	154
- Flotation of soybean hull from soybean meal	155
- Flotation of cottonseed hull from cottonseed meal	155
• Spot tests and quick chemical tests of feed ingredients	170
- Spot tests for minerals	170
Cobalt, copper and iron	170
Manganese	171
Magnesium	171
Iodine	172
Zinc	172
Nitrates	173
Phosphates	173
Sulfates	174
Sulfur	174
- Quick chemical tests for minerals and other ingredients	182
Carbonate	182
Chloride	182
Salt	183
Sugar	183
Urea	184
Blood	184
Hoof, horn, leather meal, blood meal, meat and Bone meal	185
Leather meal	185
Uric acid	186
Urease activity	186
• Qualitative tests for feed additives	196
- Quick quality tests for feed additives	196
Special reagents for the tests of feed additives	197
Test results of feed additives	199
- Methods and photomicrographs of quick test for drugs and antibiotics	202
Amprolium	202
Arsanilic acid or sodium arsanilate	203
Bacitracin	204
Carbadox	204
Chlortetracycline, oxytetracycline and vitamin A	205

Furazolidone	205
Nitrofurazone	206
Penicillin or procaine penicillin	206
Phenothiazine	207
Piperazine	207
- Quick tests for vitamins	216
Test result of vitamins	217
- Methods and photomicrographs of quick test for vitamins	218
Vitamin A, red and yellow carophylls	218
Riboflavin	219
Ascorbic acid	219
Vitamin K	220
• Quick quality tests for protein meals	222
- Quick test for fish meal quality control	224
- Quick test for quality grade of fish meal	225
- Quick test for non-protein nitrogen in fish meal	225
- Quick test for hydrolyzed feather meal in fish meal	226
- Quick test for hydrolyzed leather meal in fish meal	227
- Decomposition test for animal and marine products	228
- Quick tests for identification of plant protein and animal protein	228
- Quality considerations for soybean meal	229
- Rancidity test for animal products and oilseed meal	230
- Quick test for urea	231
Glossary, References and Index	241
• Glossary	243
• References	247
• Index	251
